COMPLETE LIQUID RECOVERY MANAGEMENT

At reDirect Recycling, we are passionate about the health of the environment and waterways, providing a vital waste disposal service to businesses and local communities. We ensure that contaminated liquids are contained and recycled.

reDirect Recycling offer collection and disposal of

- grease trap waste
- factory food waste
- septic waste
- wash-waters
- sludges and waste oil
- drilling mud
- coolant and more for commercial, farming and residential premises.

The service offers efficient and complete liquid recovery management including assessment, analysis, documentation, waste collection and disposal services at reDirect Recycling's EPA approved material recovery facility. The liquid waste is then treated and recycled to the highest possible environmental standards, returning it as highly beneficial specialist fertiliser and compost products which are used for agriculture and land rehabilitation and crop improvement

DISPOSAL FACILITIES

Deliver your liquid waste to the reDirect Recycling EPA approved material recovery facility in Kelso, NSW. This site offers a transfer station with accessibility for vehicles of all sizes and a calibrated public weighbridge.

- 11 Whyalla Circuit, Kelso, NSW 2795, 02 6334 4432

COLLECTION SERVICES

reDirect Recycling provides liquid waste management services in the Bathurst, Central West, Lithgow, Blue Mountains regions and beyond. Our liquid waste removal and transport team can manage commercial and industrial liquid waste across various industries including Food & Beverage manufacturing, wash bays, and businesses using commercial oils, delivering a timely and cost-effective removal service including emergency pumping.

With a variety of different sized vacuum trucks capable of navigating compact or difficult sites, the business can offer flexibility in services and conveniently returning the waste to a reDirect Recycling material recovery facility for processing.
