WOOD RECOVERY INITIATIVE

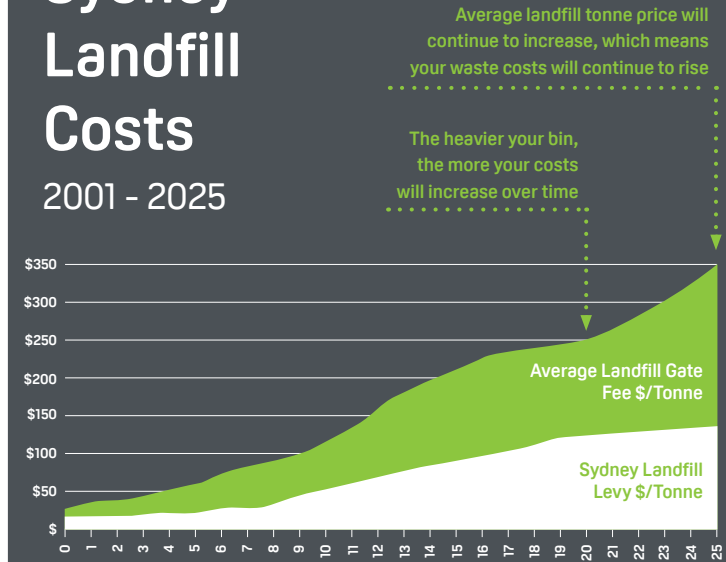

Save Money & the Environment

reDirect Wood Recycling has been established to provide a closed loop wood recycling service and offers efficient and complete single source wood recovery management. This initiative creates an industrial ecology which processes the waste and aims to close the loop on raw and engineered wood products via a sustainable product life cycle.

Sydney Landfill Costs

2001 - 2025

Source: reDirect Recycling landfill cost per tonne, historic and projected 2001-2025

reDirect Recycling offers two options for the recovery of wood pallets offering significant cost savings in landfill charges:

DROP OFF

Bring your old pallets to one of our Material Recovery Facilities:

- 21-25 Dunheved Circuit, St Marys
- 3B Williamson St, Ingleburn

ON SITE BIN

The option of a 15m³, 25m³ or 30m³ bin is placed at your premises and collected when full.

By reclaiming materials that would otherwise go to landfill, thereby reducing waste and preserving plantation forests, we protect the environment for future generations.

The manufacturing of particleboard utilises recycled pallets and wood offcuts in the production of new particleboard.

By opting for wood pallet recycling through reDirect Recycling you are assisting in creating sustainable manufacturing processes.

CREATING A COMPLETE & SUSTAINABLE LOOP

Pallet Waste PROCESS FLOW

2 Waste is combined at the reDirect Recycling Material Recovery Facility for processing

3 Waste is sorted and processed efficiently using machinery

4 Waste material is extracted and re-purposed

5 The re-purposed material is manufactured into new and saleable products

Acceptable Inputs
